Take Control with
AutoAssist

What is **AutoAssist**?

AutoAssist is a cutting-edge digital solution designed to meet the evolving needs of telecom subscribers. Whether it's topping up airtime, subscribing to bundles, or managing services on-the-go, AutoAssist puts you in the driver's seat. With intuitive interfaces and real-time capabilities, managing your telecom services has never been easier.

- Convenient access through USSD or IVR.
- No need for internet – accessible anytime, anywhere.
- A one-stop platform for top-ups, bundle subscriptions, balance checks, and more.

Key Features of **AutoAssist**

AutoAssist is packed with features that give you control over your telecom experience.

- »»» **USSD Short Codes**
Access services in a snap using customizable short codes.
- »»» **Multilingual Support**
Use the service in your preferred language for a personalized experience.
- »»» **Seamless Airtime Management**
Effortlessly share airtime and recharge balances for yourself and others.
- »»» **Dynamic Menus**
Simple, flexible navigation for all your telecom needs.
- »»» **SMS Notifications**
Get instant updates and confirmations for your actions.

What Can You Do with **AutoAssist**?

- »»» **Manage Your Telecom Services**
Check balances, subscribe to bundles, share data or airtime, and more.
- »»» **Stay Connected on the Go**
No internet required – everything can be done via simple USSD codes.
- »»» **Voice Interaction**
Prefer voice commands? AutoAssist integrates with IVR for easy voice-based control.
- »»» **Personalize Your Experience**
Change languages, build custom bundles, and tailor services to your needs.
